

# The Battle of the Neighbourhoods

Finding the best Mexican Restaurants in New York City

# Problem

- ▶ “There’s no good Mexican food in New York City.”
- ▶ That’s what most people say, especially the Californians and the Texans, and that’s when they’re putting it politely. In an early scene of the second episode of **Ugly Delicious**, as David Chang talks about his preferences for tortillas and burritos over tacos, the late Jonathan Gold jokingly replies, “You’re from New York. Of course you don’t like tacos. You haven’t had good tacos.”
- ▶ Gold makes the joke knowing it belies the truth. See, there are two major camps of New York Mexican food haters: Folks from out west visiting New York — well, Manhattan — who are looking for the sit-down Tex-Mex or Cal-Mex places where one can order plates by the number, with sour cream, enchilada gravy, and melted yellow cheese. Then there are the people who only want to go to the kinds of places where one orders in Spanish and the tacos come with onion, cilantro, slices of lime, and fresh, colourful salsas; they claim that there’s no good Mexican food in New York because, well, there are not as many **Mexicans** here to make it.
- ▶ Well to prove this wrong and as a part of my project, I will list and visualize all the major areas of New York City that have best Mexican eat outs.

# Target Audience

This project will benefit Mexican expats, aspiring Restaurant owners and Mexican food enthusiasts equally by answering the following questions too:

- ▶ Which is the best place to stay if I prefer Mexican cuisine?
- ▶ What is best location in New York City for Mexican cuisine?
- ▶ Which areas have potential Mexican restaurant market?
- ▶ What areas lack Mexican eateries?

# Data

For this project we will require the following data set:

- ▶ New York City data that contains list of Boroughs, Neighbourhoods along with their latitude and longitude. Data source : [https://cocl.us/new\\_york\\_dataset](https://cocl.us/new_york_dataset) . This data set contains all the required information related to various neighbourhoods of New York City.
- ▶ Mexican restaurants in each neighbourhood of New York City. Data source: Foursquare API. By using this api we will get all the venues in each New York neighbourhoods. We can filter these venues to get only Mexican restaurants.
- ▶ Geo-Space data. Data source : <https://data.cityofnewyork.us/City-Government/Borough-Boundaries/tqmj-j8zm>. By using this geo space data we will get the New York neighbourhood boundaries that will help us visualize choropleth map.

# Data Extraction Approach

- ▶ We will collect the New York city data from [https://cocl.us/new\\_york\\_dataset](https://cocl.us/new_york_dataset)
- ▶ Using **FourSquare API** we will find all venues for each neighbourhood.
- ▶ We will filter out all venues that are Mexican restaurants.
- ▶ We will find rating, tips and likes count for each Mexican restaurants using **FourSquare API**.
- ▶ By using **rating** for each restaurant, we will sort the data.
- ▶ To get the latitude and longitude coordinates we will use **Geopy** library (Python)
- ▶ We will visualize the ranking of neighbourhoods using **folium** library (python).
